

Professional systems for flawless finishes.

Spies Hecker helps you speed up your painting processes by classifying products into specific systems for easy and more efficient product selection.

Hi-TEC Performance System

The Hi-TEC Performance System products work in perfect combination with each other and are easy to apply in just one-and-a-half coats. Easy sanding primers, short paint application times and rapid drying get vehicles back on the road sooner.

Classic System

The dependable solution for your bodyshop. The Classic System combines simple application and reliable results with high quality. The products work in perfect combination with each other and are easy to apply, ensuring a simple and problem-free application process and reliable results with high quality.

Speed Repair System

The time-saving system for the efficient repair of minor damage. Spies Hecker Speed Repair System helps you to avoid time consuming and costly repairs for minor damages such as scratches, stone chips and small dents. Providing outstanding colour matching, protective properties and competitive pricing, with a professional, long lasting repair.

Plastic System

Today, plastics are an established feature of the modern vehicle but not all plastics are the same. The Spies Hecker Plastic Parts Paint System, supplemented with special additives for elasticity and for creating matt and textured surfaces, helps refinishers easily adapt to the various substrates whilst offering durability and protection for plastic parts.

Greentec

The conformity mark for innovative, efficient and environmentally compliant products.

The perfectly integrated GREENTEC products are simple to apply and highly economical. Look out for our GREENTEC logo on the label.

- Low share of solvent
- Ease of application
- Efficient work process
- Energy savings
