

Mobile Max IR GAS

FEATURES - Mobile Max IR GAS

- Simple functionality
- Full flexibility & mobility
- Fast curing
- Increased productivity
- Improved quality
- Less material usage
- Single phase, 240volt operation

The Mobile MAX IR GAS is a great option in the Lowbake IR GAS range. MAX IR will increase work flow and productivity. MAX IR is supported by all major paint companies. The specially designed catalytic panel creates a safe, no flame exothermic broadband heatwave. The heat generated works on the paint molecules, giving an even and faster cure compared to standard baking or electric infrared curing.

This flexible and mobile unit has simple functionality and will vastly improve the quality of your work. This unit takes regular 8.5 kg LPG Gas bottles which will last over 40hrs of continuous use.

This great mobile unit will increase your productivity with fast curing and simple functionality!
