- Galvanised finish or powder coated
- Combination of gunwash and spray out

The Lowbake Clean Station is the ideal solution for solvent extraction & small colour sample spraying in complete safety. Any model of gun cleaning machine can be installed in the Lowbake Cleaning Station. Using the Lowbake Infrared test sample drying unit will give your paint shop excellent quality and efficiency. The system is a gun wash and storage area combined with a small parts spray booth. The unit has a super quiet exhaust fan of

low power consumption and comes with an optional spray gun regulator, block valve and control panel. Gun holders are also available if required. The unit is available in a galvanised or a powder coated flat pack kit for D.I.Y assembly. This unit can also be installed by a Lowbake professional installer if required. A Hazardous Area Dossier is provided when the installation is undertaken by Lowbake as required by Australian Standards.
