Prep-Bay -With Roof and Lighting

Paint Spotting

Integrated Vacuum, Air, Power

Prep-Bay fitted with Separating Curtain

Preparation Bay

The Lowbake Rear Wall Extraction Preparation Bay is a cost efficient area suitable for sanding preparation and paint spotting on vehicles and parts. This particular design does not need a concrete pit. The Rear Wall Extraction Preparation Bay has a ceiling with lights and

the airflow is horizontal across the vehicle. The exhaust is through low level polyester exhaust filters. The prep bay is fitted with a ducted vacuum system with an integrated spray air in each bay for efficiency.
