Save one hour a day
with only five cars a day.

Series 275
compared to
Series 257
using the example
of a car front
refinish.

Series 275
with patented
binding agent
technology
...providing a
finish second
to none.

The professional refinisher
notices it straight away.

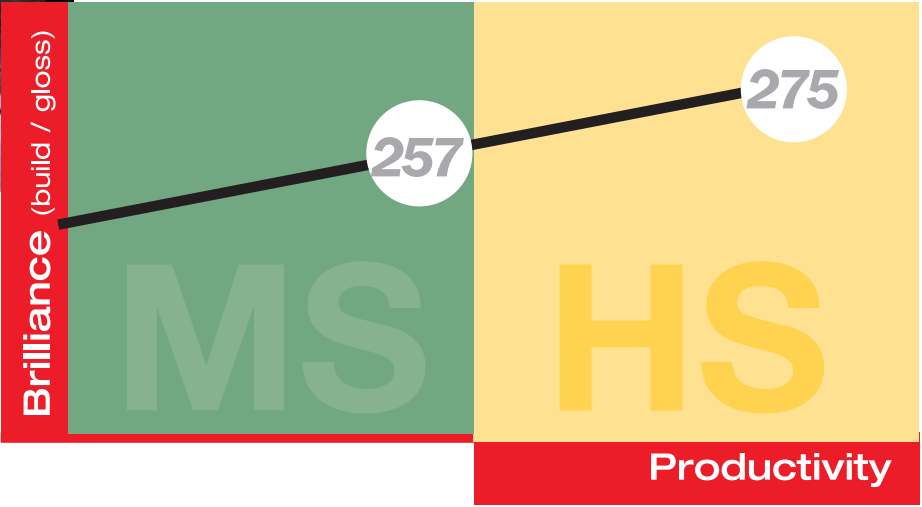

The new, one-stage Permasolid top coat series 275 has been designed specifically for the evolving needs of the automotive refinish industry. It utilises the latest in High Solids technology and offers significant productivity improvement compared to Medium Solid technology:

- One-stage means an application of one and a half coats with no flash-off, which can be up to 50% faster than the usual two-coat process with flash-off.
- Consumption is better than MS by between 30-40% due to the excellent coverage and easy application. And naturally, the new HS275 is VOC compliant to Europe's legislation.

But most impressive about Permasolid top coat series 275, is its final appearance. The gloss levels are exceptional and undoubtably give one of the best top coat finishes available today.

The new VOC-compliant
top coat system lets you work
efficiently and achieve
a brilliant result.

GREENTEC product = VOC-compliant with Europe's legislation

Top Coat Refinishing is now easier than ever!

The new VOC-compliant top coat series with excellent application properties!

Benefits at a glance.

- Application
- Drying
- Polishing
- Material consumption
- Use of hardeners
- Mixing ratio
- VOC-compliant

VHS hardener

3:1

yes

So Easy

- Excellent coverage in 1.5 coats, giving up to 30% material saving*.
- Easy mixing 3:1 with new VHS hardener generation (**Very High Solid**) + 15% reducer.
- Selection of 4 hardeners makes individual adjustment to different working conditions easy: 3220 Fast, 3225, 3230 Slow, 3240 Extra Slow.

So Good

- Groundbreaking, patented binding agent technology
- High colour accuracy
- Very good opacity and excellent paint flow / gloss
- Undoubtedly the best 2K refinish available today!

So Fast

- Fast, easy application that is comparable with MS top coats, but without the interim flash-off.
- Very fast drying: 20-30 minutes/60°C.
- Save time & money!

Environmental protection

- GREENTEC product = VOC-compliant
- 30% less solvent emissions*

*Compared to Permacron Topcoat Series 257
